

Tree Trunk Guard

Exterior

Material

- Corten steel (Spring, Autumn and Winter)
- Galvanised steel + RAL Powder coating
- Galvanised steel
- Hardwood

By using Tree Guards you offer the tree protection from external influences. Tree Guards in combination with our Grilles offer you both aesthetics and functionality as a total solution. Simplicity makes our Guards functional and robust. The right construction and materials make the Guard suitable for the public space.

Our Guards are equipped standard with a bracket with M10 assembly holes. Because of this, they are easy to assemble on our Tree Grilles or on the existing foundation.
