

Nylon Tree Tie

Tree Ties

The GreenMax Nylon Tree Ties are used to easily bind up and fix trees.

By using a broad tree tie the trees are being kept in the right position.

Material

- Nylon
- Colour: grey/black

Type	Length	Width
Nylon Tree Tie	25 or 50 m ¹	5 cm
Nail + /- 400 pieces (2.5 kg) per box	40 mm	3,1 mm

Nail

Material

- Jute
- Colour: beige
- Roll Length: 15 meters and 25 meters
- Width: 7 and 8 cm
- Biodegradable

Dimensions

Type	Length	Width
Jute Tree Tie	25 m ¹	7 cm
Jute Tree Tie	15 m ¹	8 cm
Nail + /- 400 pieces (2,5 kg) per box	40 mm	3,1 mm

Jute Tree Tie

Tree Ties

The Jute Tree Tie is made of strong, 100% recycled woven jute. The added advantage of using jute is that it does not cut into the bark of the tree. The tie is secured to the tree stake using tacks.

It has a tensile strength largely comparable to that of the Nylon Tree Tie. The Tree Tie remains in place for two growing seasons. The decomposition process commences after three years, so that if one forgets to remove the tie, it will simply decompose naturally.

Material

- Canvas reinforced rubber, 100% recycled
- Colour: Anthracite/black
- Roll length: 25 meters
- Width: 4 cm

Dimensions

Type	Length	Width
Canvas reinforced rubber tree ties	25 m ¹	4 cm
Tree tie buckle	Nvt	5 cm innersize
Nails 400 pieces (2,5 kg) per box	40 mm	3,1 mm

Tree tie buckle

Canvas Reinforced Rubber Tree Tie

Tree Ties

GreenMax's rubber tree ties are canvas reinforced and are used for easy tree tying and anchoring.

By using wide tree ties, trees are kept in the correct position. By means of (tree tie) nails, the tie can be attached to the tree stake.

The tightening loop can be used as a spacer between the tree stake and the tree trunk.
