Non-woven Root Barrier

RootControl

The RootControl® non-woven root barrier is used as a dividing wall between trees and what needs protection such as paving, sewers, pipelines, etc.

RootControl® is a lightweight and flexible material and has many possible applications.

Placing a root barrier of RootControl® has a quick return on investment. Renovation of hard landscapes and the renewal of cables and sewage pipes due to root damage are no longer necessary. Installing RootControl® ensures future damage will not occur.
