

## Earth anchoring for sheet piles

In a changing climate with increasingly extreme weather conditions, it is essential to securely anchor structures within infrastructure. Vulcan® Earth Anchors provide a safe and stable solution for long-lasting infrastructure.

- Fast and easy installation
- The only supplier offering Earth Anchors not only in galvanized steel and aluminium bronze, but also in stainless steel
- Fast delivery from stock
- Fully manufactured in Europe from recycled steel
- Available in various strengths, ranging from 1 to 450 kN

**Strong and stable sheet piles start with strong anchoring.**

## On-site support

To ensure every project is successfully completed, we offer on-site support. This ensures that our solutions are installed correctly and form the foundation for a safe and reliable above-ground infrastructure.

- On-site testing
- Supervision during project execution
- Collaboration with a partner that has been specialising in anchoring solutions since 1995
